Research Interests

My research studies how firms should design information and incentives in dynamic operational processes where participants interact with one another and, increasingly, with AI agents. In a complementary stream, I work with healthcare practitioners to develop routing and scheduling methods for hospital-at-home care programs.

Working Papers

1. **The Strategic Secretary Problem**, with Joel Goh. Under review at *Management Science*.
2. **Delegating Innovation: Sequential and Parallel Search under Competition**, with Zhi Chen and Zhenyu Hu. Under review at *Production and Operations Management*.
3. **Racing Against Automation: Dynamic Incentives When AI Can Preempt the Human**, with Feng Tian, Yangge Xiao and Ying-Ju Chen. Major revision at *Manufacturing & Service Operations Management*.

Work in Progress

4. **Timely Care at Home: Routing and Scheduling for Hospital-at-Home Programs**, with Yvonne Huijun Zhu, Joel Goh and Stephanie Ko.
5. **Intertemporal Reference Design Through Performance Transparency**, with Lin Chen and Guillaume Roels.
